BEGINNERS BASIC CLASS - PART 2

Our education, Linda Scott, will be conducting the second class on BASIC for beginners before our regular meeting on Saturday. The class begins at 3PM. Be sure to bring your *ATARI* Basic manuals.

Club Library will be open from 3:30 to 4:00 and after our business meeting which begins at 4:00 PM.

Be sure to look over the new literature library. A checkout system has been set up which allows MILATARI members to take material home.

All exchange newsletters may be taken out in addition to current issues of *InfoWorld*, *SOFTLINE*, *Mini-Micro Systems*, *small systems world*, *Personal Computing*, and *Popular COMPUTING*.

We also have two copies of *De Re Atari* and one copy of the ATARI OS and Hardware manual available for checkout.

MORE HARDWARE SHOWS UP FOR YOUR ATARI

by David Frazer

With the popularity of the ATARI computers increasing, more manufactures are inclined to design hardware which will expand its utility. The items listed below describe many of these new items.

Disk drives:

PERCOM - single and double density in both single and double sided configuration. 5 inch drives which can be run with a ATARI 810 drive.

MPI - no information at this time.

CORVUS - Mass storage and network system. 'HARD' disk with storage capacity of 6, 11, and 20 megabytes. Users can share mass storage as well as printers and other peripherals via the network system.

Speech Synthesizers:

VOICE BOX - by the Alien group. Plugs directly into your ATARI via the serial port. Not interface, cables, speaker, amp, or external power required. Works with phonetic language.

ECHO-6P - by Street Electronics Corporation. No interface information available.

TYPE-N'-TALK - by VOTRAX. Works with phonetic language. Requires RS-232 port via ATARI 850 or similar device.

80 Character Video: (Monitor required)

FULLVIEW-80 - by Bit 3 Corporation. Display card mounts in 3rd RAM slot of 800. Allows normal ATARI 40 column/graphics mode. 80 column mode provides upper and lower case characters with full descenders.

CM-1000/V - by Compu-Mate Corporation. Separately cased unit which supports 80 column video and connects to computer video monitor port. This unit will also replace the 850 interface, providing a serial port and 8 bit parallel printer port. (Unit is available as CM-1000 which gives only the serial and parallel ports but not the 80 column video.)

Videodisc Interfacing:

Discmaster 5000 - by New Media Graphics. Using the Pioneer VP-1000 videodisc player, software included and an interface provided by New

Media Graphics, you have a fully intergrated system.

This list is in no way complete. Readers are encouraged to send information other equipment to the editor for publication.

SUPPORTING BUSINESSES

The following businesses offer a discount to members of MILATARI. You must show your valid MILATARI membership card to receive your discount.

MICROCOMPUTERS and MAGIC
256 1/2 West Broadway Street
Waukesha, Wis 53186
(414)548-0700

MICROAGE COMPUTER STORE
2675 North Mayfair Road
Wauwatosa, Wis 53226
(414)257-1100

LIBERTYVILLE VIDEO and COMPUTER CENTER
Attn: Steve Singer
Cambridge Plaza
Libertyville, Ill 60048
(312)367-8660

UNCLASSIFIED ADS

(MILATARI will post ads for its members at no charge. Others \$1.00 per issue. Send ad info to newsletter editor by 1st Saturday of month)

WANTED: Articles for this newsletter. How about it gals and guys? Send your ideas, programs, reviews, hot tips, whatever to the editor.

SOFTWARE: MILATARI members Jim Luty and Bill Simotti are selling software at a 15% discount to members. Call Jim at 421-3135 or Bill Simotti at 352-1790 for prices.

ATARI announces price reductions and new software

(from ATARI news releases and InfoWorld)

Atari made several announcements of price reductions and new software for its two computers at the recent Consumer Electronics Show held in Chicago.

"We have reduced the suggested retail price of the Atari 400 computer from \$399 to \$349, and the prices of six entertainment programs anywhere from \$5 to \$20, as a result of economics of scale achieved through greater volume sales," said Keith Schaefer, vice-president of sales.

Among the new programs Atari released at CES were Atari Speed Reading and Music Tutor and two educational packages designed for children between the ages of three and six. The announcement of the new software packages means Atari has more than 175 "home computer programs" according to Schaefer.

Atari also unveiled a new kit called the Communicator II at the show. Included in the kit is a new direct-connect modem (DCM) called the Atari 835, a user's manual and TeleLink II, a new cartridge from Atari. TeleLink II is supposed to allow users to store and automatically dial two frequently called information service numbers and corresponding access codes.

Atari said the kit will also contain information on using CompuServe, Dow Jones News Retrieval and The Source, with one hour of free time provided on all three information utilities.

The suggested retail price for the Communicator II kit is \$279.95, and it will be available in the fourth quarter of this year, according to the company.

"The new Communicator II kit with its direct-connect modem will make it easier for our users to exploit the many information services available to home computer owners," concluded Schaefer.
